

Schools vs. Home Heating, Air and Ventilation

Joey Lodowsky, Connor
Glover & Johnny Collins

Science Wing

Silly Blue Closet HVAC

Fine Arts

Old HVAC
with large
intake and
outtake
pipes and
vents.

Chapel

Overly
integrated small
grates into small,
non visible areas
with major unit
outside of
Chapel

Mr. T's Classroom

Entry and Exit
Grates for airflow
along with large
HVAC unit on side
of room with
directly integrated
grates.

Locker Rooms & Athletic Hallway

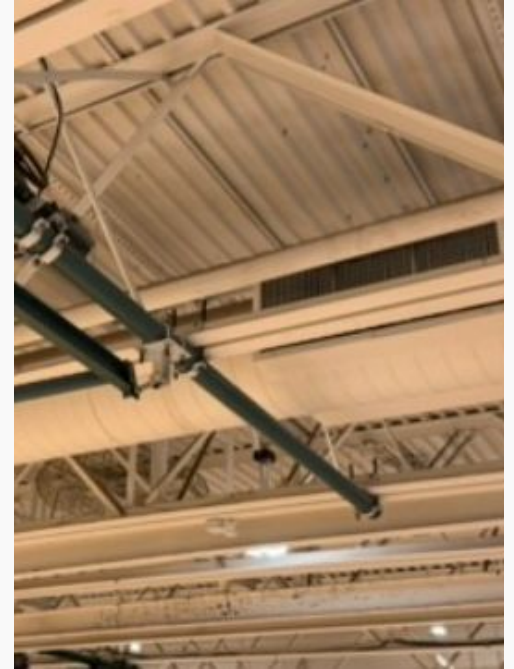

There are old, very large, ineffective, HVAC tubes and vents on the ceiling

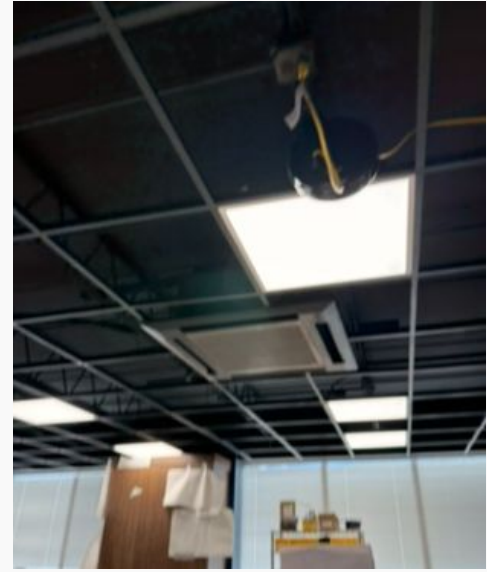

Salvi

Large vents
and tubes on
ceiling to
prevent/mini
mize damage

Lunch Room and Engineering Rooms

Huge HVAC pipes, tubes, grates, air exit pipes, and vent system to support large area.

Auditorium

Integrated vents into ceiling and side of room that aren't visible to one viewing due to smart angling.

Joseph's House

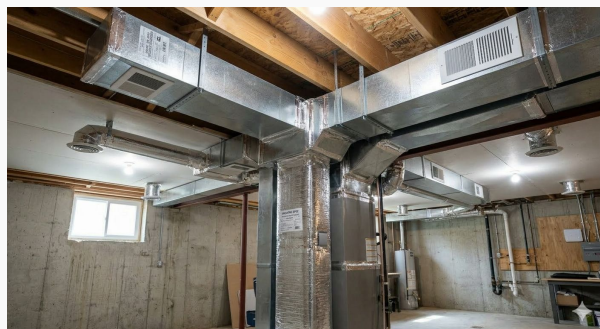

Johnny's House

RECONSTRUCTED HVAC SYSTEM IN A DIFFERENT COLONIAL HOUSE

Conner's House

How Literally All of Them Work

The only difference between them is their housing and size, all HVAC works effectively the same.
