

Geodetic Survey Marker

By Conner Glover

Troubles I encountered through my journey

- The only parking near the marker was a bar and a neighborhood with a reputation for slashing tires and smashing windows to protect their lake, so whatever I do must be fast.
- The frozen lake that I was planning to cross to make it to the side of the road from the back of their neighborhood was quite sketchy and seemed like it could not bare my weight.
- There was no indication that there even was a geodetic survey marker present at the location

Troubles I encountered through my journey (continued)

- While searching for the marker, I could not tell if the marker just did not exist or if it was trapped underneath snow.
- The only small path on the side of the road was very wet and soaked my socks with murky water during my journey. I persevered.
- Due to the terrain, I was required to walk like an idiot to make it to where Google Maps was directing me.

Troubles I encountered through my journey (continued)

- Where the NOAA map and Google Maps said the marker was was inaccurate because the median was empty, but a sign notifying drivers of the upcoming roundabout.
- The NOAA map could not decide whether the marker was in the median just before the roundabout or on the side of the road, and Google Maps walking directions were not helping.
- Because I was unable to find any sign of a geodetic marker, I decided to give up and see what I could find on the internet.

The marker.

Mark Recovery	More info
Passive Mark Page	More info
PID	AJ2964
Name	DOWELL
Google Maps / Street View	More info
Position Source	ADJUSTED
Vertical Source	GPS OBS
Vertical Order	
Vertical Class	
Stability	B
Satellite Usable	Y
Marker	I = METAL ROD
Last Recovered	20000721
Last Condition	MONUMENTED
Last Recovered By	SECI
Height Mod	
CORS Site ID	
PACS or SACS	
State	IL
County	MCHENRY
USGS Quad	WAUCONDA (2018)
Ellipsoid Ht	190.025
Position Datum	NAD 83
Position Datum Tag	(2011)
Position Epoch	2010.00
Orthometric Ht	224.1
Vertical Datum	NAVD 88
Vertical Epoch	
Geoid Ht	-34.047
Geoid Model	GEOID18
Dynamic Ht	
Modeled Gravity	
Horizontal Network Accuracy	1.31
Ellipsoid Network Accuracy	1.57
Network Accuracy STD N	0.61
Network Accuracy STD E	0.41
Network Accuracy STD Ht	0.80
Network Accuracy Correlation	-0.24480962
First Recovered	20000721
Setting	S9 = STAINLESS STEEL ROD IN SLEEVE (10 FT.+)
Stamping	DOWELL

Right/Wrong/Learned

- Right

- I searched the area and overcame my fear of Lake Griswold's neighborhood.
- I tried to use objective measures and technology like Google Maps to find the marker.

- Wrong

- I probably didn't even find the right marker.
- The assignment was extremely late.
- I didn't think to take a picture on my way back where I had to walk over the plate I identified as the marker.

- Learned

- Take more pictures.
- Do not be late.
- I never learn.
