

1.1.3

Art Deco Style

By Conner Glover

Timeline

01

Beginning

Art Deco began in the 1910s in Paris around the beginning of World War I. Development was scarce because of limited resources due to the war.

02

Peak

After World War I, Art Deco provided a sense of hope and progress. This made Art Deco extremely popular between 1920-1930s. It began to die down around the great depression and World War II arising.

03

End

Around the 1960s, Art Deco has a resurgence following a growing interest in the past and exhibitions showing the design. Today, Art Deco continues to be an inspiration for artist and architects.

Art deco focus on form and symmetry with many bold colors and luxurious materials like walnut, oak, chrome, stainless steel, glass. Art deco buildings have a strong vertical focus and tend to have many stories, but can vary with anywhere from one to over 100 floors.

Eltham Palace

Eltham Palace in London, England was created for the Courtauld Family in the 1930s. It features a iconic entrance hall designed by Rolf Engströmer.

Maison de Verre

Maison de Verre in Paris, France is famous for its innovative use of glass blocks, steel, and other industrial materials. It was built between 1928-1932 and translates to “House of Glass”.

Villa Cavrois

The Villa Cavrois in Croix, France was built for textile industrialist Paul Cavrois. It's considered the finest work of architect Robert Mallet-Stevens.
